Design in the RGB color mode.

Viewing Distance & Quality

Image resolution & placed bitmap files should be created for the intended viewing distance.

| ose | 1 to 3 Feet | 2000 to 3000ppi | (at 1/10 s |
|--------------|---------------|-----------------|------------|
| ose - Medium | 3 to 10 Feet | 1000 to 1500ppi | |
| edium - Far | 10 to 20 Feet | 500 to 1000ppi | |
| ır | 20+ Feet | 350 to 750ppi | |

Live Area

This is what the audience will see.

Hemline

Keep images and text inside the line to prevent important graphics from falling onto the hemline or interrupted by a grommet.

Convert fonts to curves or paths before saving. Save as .png .jpg .pdf .tif .eps .svg

Before saving remove the instructions & guide layers.

Extend background images or colors to this line.

If using our Dye Sublimation process add an additional .10" bleed to all sides.
