Color & Quality

Design in the RGB color mode.
Bitmap files need to be 100 - 150ppi at actual size.

Colors come out more vivid with this setting. You can design up to 300ppi.

Bleed

Extend background images or colors to the blue line.

Bleed is 3" on all sizes. You may need more or less material - Measure.

Live Area

This is what the audience will see.
Place important text and images inside this line.

Templet may need to be resized. Measure inside area of cabinet to the nearest 1/4"

Save File

Convert fonts to curves or paths before saving.
Save as .png .jpg .pdf .tif .eps .svg

Before saving remove the instructions & guide layers.
