# 22" size VividHead Drumhead Template

IMPORTANT INFO for Vector Files:
- Save this PDF file and reopen it in your Vector Design program (Illustrator, FreeHead, Corel Draw).
- You MUST convert all fonts to curves or paths, to eliminate the need to send fonts.
- Send a copy of your final design as .ai file.
- Do not embed images.

DESIGN NOTES:
Create your design within the white circle area. Do not place your type or logo too close to the edge. This will make it easier to read.

BLEED NOTES:
The black circle is the Bleed. We print the bleed area. You can see some of the bleed slightly, so you may want to design your image into this area OR just leave it the Black Color. Note 1/4" of the bleed will get cut off in final production.
